

- FOIA – We received a FOIA from Oregon Public Broadcasting
 - It is quite broad and they asked for it to be expedited.
 - We estimate all R10 offices (except the non-Oregon ops offices and OMP will have responsive records). Also all regions and OECA, OGC and OAR
 - Questions: * Copies of all records related to Bullseye Glass Co., Uroboros Glass Studios and artistic glass manufacturing * Copies of all communication, regardless of format, since the beginning of 2015 within EPA and/or with the Oregon Department of Environmental Quality, the Oregon Health Authority * Copies of all communication, regardless of format, since the beginning of 2015 exchanged with the U.S. Forest Service regarding its moss study and air quality in Portland * Copies of all communication, regardless of format, between EPA and Bullseye Glass Co. or Uroboros Glass Studios regarding its moss study and air quality in Portland
- 6S applicability question:
 - OC is the final decision maker and consults OAQPS and OGC.
 - General process is that a source requests clarity on applicability and OC or the Region writes an applicability determination that is published in the federal register and available online in the applicability determination index.
 - We do not have a source requesting here, but we do have a state who is requesting (though not yet formally).
 - The plan is for the state to ask for guidance on the applicability of 6S to these sources and for OC to write a letter responding. It wouldn't be a formal AD but it would serve the same purpose. We'd then distribute to all regions to share with their states.
 - The letter may be specific only to Bullseye or may speak to generally what we meant by continuous and how operations, **Ex. 5 - Deliberative Process**. We are still determining.
 - I reached out to OR (left a voicemail) to have them initiate a request.
- Forest Service has reached out about using their new moss method in other areas (Geoff Donovan the lead researcher contacted us). OAQPS provided the following contacts: Tim Watkins in ORD and Chet Wayland in OAQPS.
- Information requested from companies:
 - Bullseye – partial submittal received and remainder will be submitted by March 2nd.
 - Spectrum – partial submittal received. Remainder is finished today and they asked to not mail (and for us to pick up). I suggested they hand deliver it to Seattle.
 - Uroboros has submitted its full response.
 - We have not yet issued an information request to the borosilicate plants but hope to soon.
- Other
 - The letter to Kate Brown with the memo from Janet was sent today. It is on the onedrive.
 - I have not heard an update on Bullseye from OR since we were there on Monday. I left messages with staff and management this afternoon for an update.
 - Judy Smith will be working up talking points for if the press call about Spectrum or other glass facilities in Region 10. She will coordinate with Puget Sound. Puget Sound has already received several calls from OPB.

- Monitoring in Portland (according to OPB)
 - 4 monitors around bullseye
 - 1 met station – Rob Elleman is requesting information on this.
- Ongoing knowledge building still necessary on:
 - Hex chrome
 - Metals retained in the glass
